
C-Store Commander

Integrated POS and Back Office Software System

Solutions For Indigenous/First Nation Fuel Retailers

At Infonet, we offer comprehensive full featured integrated point-of-sale systems **designed specific** to the needs of Indigenous/First Nation fuel and convenience store retailers. We have Indigenous/First Nation customers in BC, Alberta, Saskatchewan, Manitoba, Ontario, Yukon and Nunavut.

C-Store Commander fully manages Status Tax exempt sales per Provincial requirements by automatically removing PST, GST, HST and Provincial fuel and tobacco taxes. Our solution can also be tailored specific to the needs of those retailers who collect FNST or the FNGST.

Provincially Certified Solution:

- Alberta – Alberta Indian Tax Exemption (AITE Direct)
- Saskatchewan - First Nations Fuel & Tobacco Tax Refund Program
- Ontario – First Nation Gas Tax Rebate (FNGTR)

System Features:

- Option of having segregated tobacco inventory and pricing (“Red” stock; “Black” stock)
- Specialized reporting for Status purchases and transactions
- Weekly limit management and resets
- Card holder registry database with reporting
- AR/Band Account management
- FNST and FNGST tax setup and application

C-Store Commander is a full featured and robust EPOS (Electronic Point of Sale) and BackOffice Management software system designed for retail gas stations. **C-Store Commander** allows an Indigenous/First Nation retailer to install a system that offers all of the attributes of an industry standard POS system with the added ability to manage exempt product purchases at their retail location. **C-Store Commander** is the perfect choice for those retailers who want to have a system that offers in depth Back Office management features necessary to meet the unique needs required at an Indigenous/First Nation fuel retail operation. System features include robust price book management; full scan technology combined speed/hot buttons; real time inventory management; product promotions, loyalty, gift card, pre-paid card, integrated Chip&PIN card processing; integrated pump control, pay at the pump, fleet card processing, comprehensive BackOffice reporting, and more.

We also can supply rebate reporting solutions that can be used alongside Bulloch and other POS systems that do not manage rebate product sales.
