

C-Store Commander EPOS System – Gas Stations and Convenience

At Infonet, we offer a comprehensive full featured integrated point-of-sale software system **designed specific** to the needs of retail fuel and convenience store retailers. We work with all our customers to deliver the right solution to meet their needs. Our system allows retailers to meet the following critical objectives:

1. **Attract customers** – drive in-store traffic to increase sales.
2. **Create connections** – using the till and pump as loyalty touch points.
3. **Go standard** – maintain a consistent platform through your store(s)
4. **Control costs** – protect your long-term investment.

C-Store Commander is a very effective and extremely full featured and robust EPOS (Electronic Point of Sale) software system that includes dynamic BackOffice management. **C-Store Commander** is for those retailers who want a POS system that offers robust product management, site management and dynamic sales/financial/results reporting.

C-Store Commander POS Software utilizes touch screen technology and operates using Windows 11. System features include robust price book management; combined speed/hot buttons; comprehensive real time inventory management; product promotions, loyalty, gift card, pre-paid card, integrated Chip&PIN, TAP/contactless for both inside and pay at the pump transactions; fleet card and private card processing, comprehensive BackOffice data and reporting and more.

Integrated POS Benefits

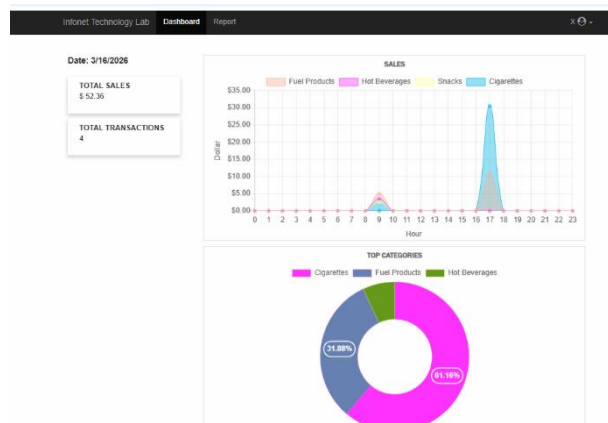

The benefits of better store automation by using an integrated POS are many and the following list highlights what we believe are the most important:

- Multiple payment acquirers certified – USA, Canada and Middle East
- PCI-SSF 3.3 audited and certified
- Business Intelligence to make better decisions.
- Better and improved customer experience
- Faster and more accurate transactions
- Increased customer throughput
- Accurate price data, accurate inventory measurement
- Reduced shrinkage, accurate category ringing
- Increased marketing and sales opportunities
- Ability to do cross promotions.

C-Store Commander BackOffice Benefits

- Automated inventory tracking
- Real-time fuel reconciliation
- Rationalize site inventory by 5 to 10%.
- Increase sales by 2-4%
- Improve operating margins by up to 5%.
- Identify and reduce shrink by up to 25%.
- Reduce ordering and administration time.
- Labor cost reduction
- Advanced reporting
- Employee management
- Increase customer satisfaction through improved service levels.
