

Product Detail

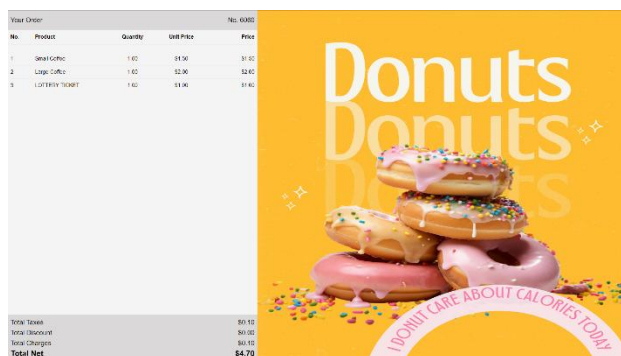

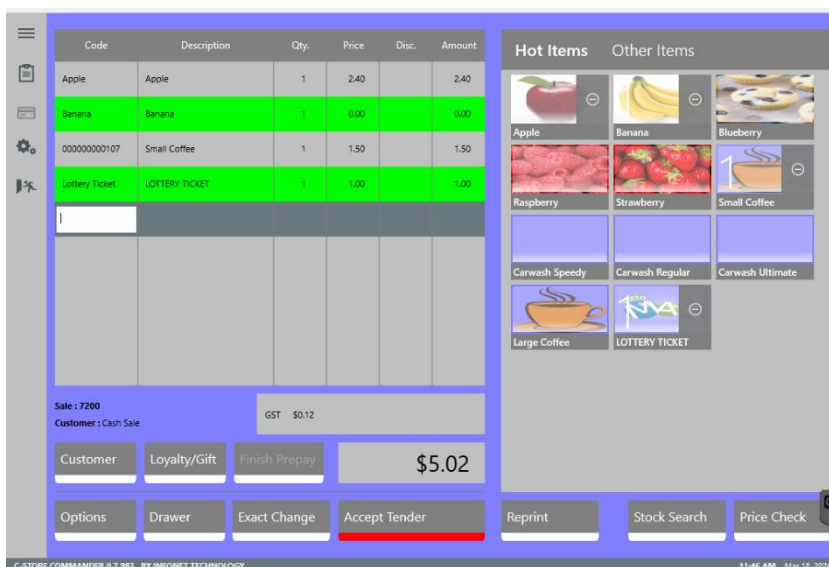

C-Store Commander POS PT Software

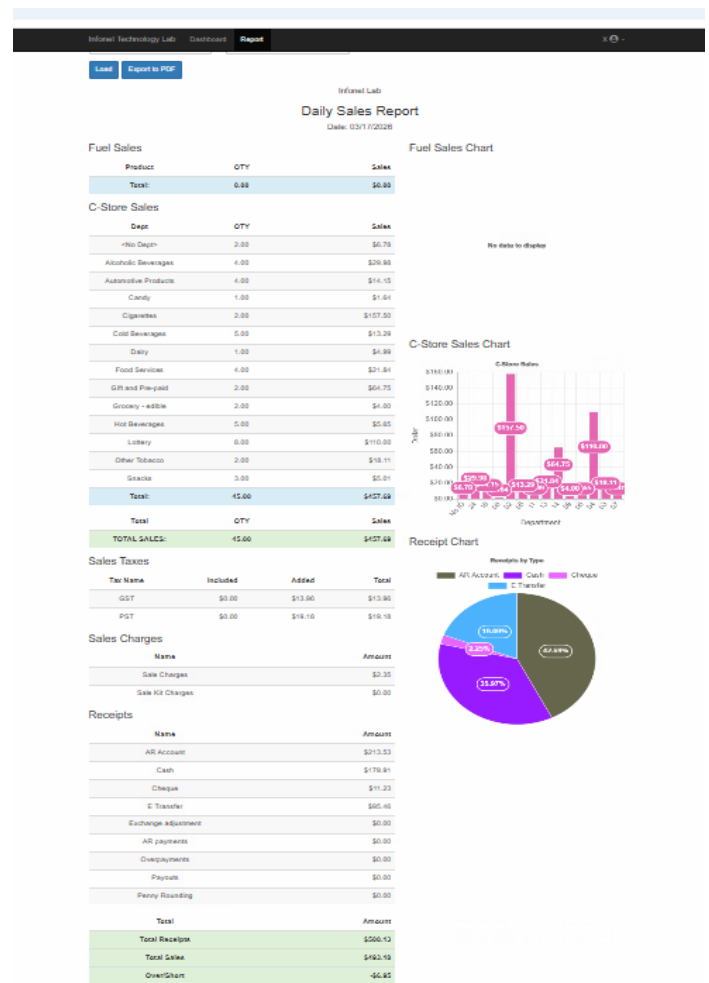

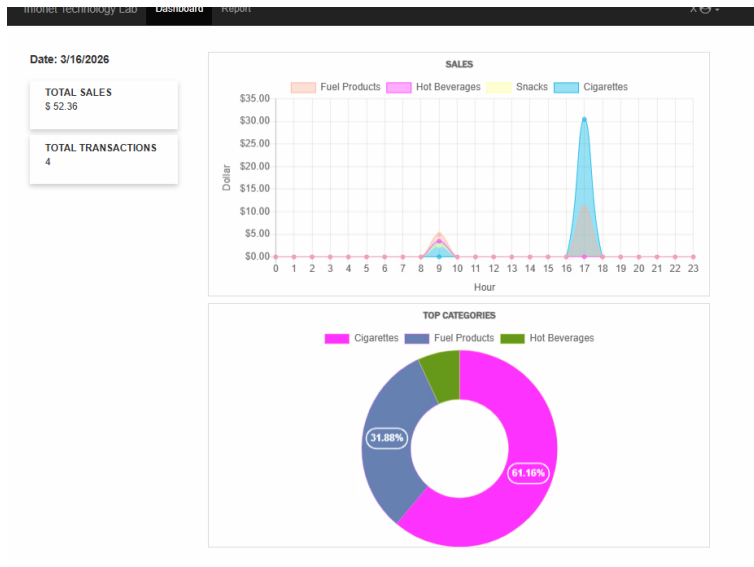

POS System for Convenience Store Retailers

At Infonet, we offer comprehensive full featured integrated point-of-sale systems **designed specific** to the needs of convenience store retailers.

C-Store Commander PT is a cost-effective EPOS (Electronic Point of Sale) software system that allows a retailer to implement a modern full featured POS system. Utilizing .NET and an MS-SQL database running on Windows 11 OS. The system includes the following:

- Full touch screen POS with full scanning capacity as well as stock item sales via hot/speed keys or manual entry.
- Semi-integrated credit and debit card processing with TAP.
- Graphic/picture Hot Product icon keys
- BackOffice software with comprehensive reporting, full cycle inventory management, dynamic promotions, customer management, unlimited products, full tax management, unlimited tenders, settable charges, deposits, bottle deposits. eco fees, etc.
- Customer Display Advertising
- Web based Information Dashboard – allows for remote access of store performance reports.

Integrated POS Benefits

- More sales information with better specifics
- Increased productivity,
- Better and improved customer experience
- Ability to generate detailed sales and transaction data and reports.
- Increased customer throughput
- POS scanning – accurate price data, accurate inventory measurement, reduced shrinkage, accurate category ringing
- Semi-integrated Chip & PIN processing with TAP
- Increased marketing and sales opportunities
- Ability to do cross promotions.

We work with all our customers to deliver tailored solutions to meet their needs. Our systems allow retailers to meet five critical objectives:

1. **Attract customers** – drive in-store traffic to increase sales
2. **Create connections** – use the till as a loyalty touch point
3. **Get a dynamic system** – deploy an integrated solution for higher ROI
4. **Go standard** – utilize a modern POS
5. **Control costs** – reduce processing and accounting costs
