

C-Store Commander and Fuel Commander Software for Unattended Fuel Sales

This capability allows any fuel seller to offer unattended fuel sales to both the general public and commercial customers at their fuel locations.

Cardlocks, aviation sites, marina's, unattended 24/7 retail fuel sites have the ability to enable secure fully automated fueling with real-time monitoring and remote management.

Our software manages the fuel site in the absence of on-site personnel. The benefit of using this capability is to offer unattended fuel sales in a dynamic and cost-effective basis. A site operator will be able to realize increased fuel sales and increase customer satisfaction, whether the site is completely unattended or simply offers overnight/after hour's unattended fuel sales.

The offering allows for the use of:

- (1) pay at the pump enabled dispensers including Wayne DFS, GVR and Bennett.
- (2) Payment Terminal device including WeVend, AMP, Concept2Design, GVR, WayneDFS, and Bennett.

24/7 unattended fuel availability

- Full Chip and PIN card acceptance, with TAP
- Private card and Fleet card acceptance
- PCI compliant, PA-DSS certified
- Choice of on-display safety training
- No attendant needed
- Multiple payment options
- Reduced operating and administrative costs

Ask us how we can offer your site dynamic unattended fuel sales management.
